

BHAVYASRI SUDHINI

Hyderabad, Telangana | bhavyasrireddysudhini21@gmail.com | +91 6303948996 | LinkedIn | GitHub

Software Engineer with hands-on experience in full-stack development and applied AI; contributed at Infosys to end-to-end MERN stack enterprise applications; worked on integrating LLM APIs to replace manual workflows with automated systems.

SKILLS

Languages: Python, Java, JavaScript, TypeScript

Full-Stack: React.js, Next.js, Node.js, Express.js, REST APIs

AI/ML: Machine Learning, Deep Learning, Computer Vision, Graph Neural Networks, LLMs

Data Systems: MongoDB, MySQL

Tools: Git, Docker, Vercel

EXPERIENCE

Infosys — AI Intern

Aug 2025 – Oct 2025

AI-Powered Identity Verification & Fraud Detection for KYC Compliance

- Built an end-to-end KYC verification system to validate user identity documents and detect fraudulent patterns, achieving 90%+ accuracy on real-world datasets through structured data processing and model-based classification.
- Designed and implemented automated identity matching logic to eliminate duplicate records and streamline compliance verification, significantly reducing manual review effort by 40%.
- Developed backend services and integrated them with a web-based interface to support internal enterprise workflows, enabling faster and more consistent verification processes across teams.

PROJECTS

KnowledgeVault — AI-Powered Second Brain

Next.js | TypeScript | Supabase | Gemini AI

- Built a full-stack knowledge management system for structured storage, retrieval, and organization of user data across multiple formats.
- Integrated Gemini AI to generate summaries, extract key information, and improve content searchability through automated tagging.
- Designed secure data isolation using Supabase Row-Level Security (RLS) with JWT-based authentication and enabled conversational search through custom API routes.

Prenatal Care AI — Multimodal Clinical Decision Support System

TensorFlow | OpenCV | FastAPI | React | MongoDB | Gemini AI

- Built a multimodal deep learning system that combines clinical vitals and ultrasound image analysis for maternal risk prediction and fetal biometric estimation.
- Developed computer vision pipelines using OpenCV and TensorFlow to extract features from medical images and improve diagnostic accuracy.
- Integrated Gemini AI to translate model outputs into patient-friendly explanations and personalized health recommendations.

EDUCATION

Vignan Institute of Technology and Science, Hyderabad

Nov 2022 – Jul 2026

B.Tech in Computer Science and Engineering (AI & ML)

CGPA: 9.13

Sri Chaitanya Junior College, Hyderabad

Jun 2020 – Apr 2022

Intermediate (MPC)

Percentage: 96.5%

Viswa Bharati High School, Hyderabad

Jul 2019 – Apr 2020

SSC

GPA: 10

CERTIFICATIONS

- Database Programming with SQL — Oracle Academy
- Supervised Machine Learning: Regression and Classification — Coursera
- Java Programming — NPTEL
- Full Stack Web Development — Udemy
